

Model Risk Management

The Industry's Leading MRM Solution

Model Risk Management on Connected Risk[®], the industry's leading MRM solution, empowers your model risk team to create and maintain your model inventory using effective workflow management.

[Explore More on Our Website](#)

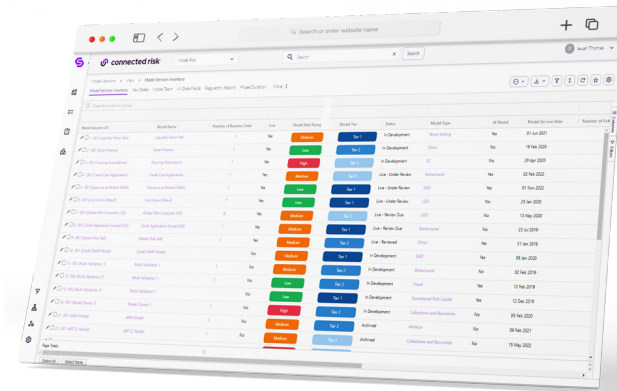

The Comprehensive Capital Analysis and Review (CCAR), Fundamental Review of the Trading Book (FRTB), Targeted Review of Internal Models (TRIM), International Financial Reporting Standard 9 (IFRS 9), Supervision and Regulation Letter 11-7 (SR 11-7) and Basel III have all added to increased regulatory pressure.

Connected Risk[®]'s Model Risk Management Solution helps senior managers understand the modelling being used and explain it to regulators and the Board. It ensures that data, documentation, and any issues arising are captured on-the-go and allows for enterprise-wide reporting on your organization's entire inventory of model data.

Model Risk Management provides you with a comprehensive approach to model inventory management, enabling your teams to:

-  **Track all models**
Track all models, across all risk themes, using a single inventory store, helping to reveal any potential redundancy and duplication within the model inventory.
-  **Identify issues**
Identify model issues and track through to resolution quickly and efficiently.
-  **Add documentation**
Add supporting documentation to demonstrate methodology and results.
-  **Evidence governance**
Evidence necessary governance for independent and regulatory review.
-  **Faster responses**
Have a faster response to regulatory changes that impact your models.
-  **Reduce risk**
Reduce the risk of non-compliance and recognize potential opportunities.
